Animal Portraits

Boone

*An expression in pride:
pride in craftsmanship
and pride in ownership*

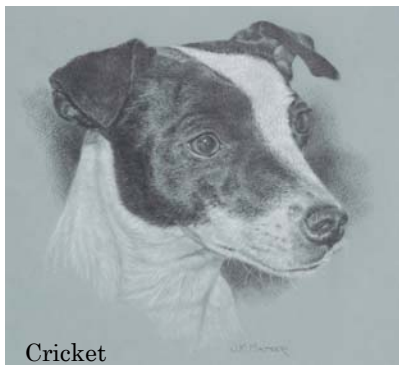

Photo Information

Photos should be chosen with Care

Items to Look for

- Clarity and sharpness are essential.
- The more information available in the photo, the more successful the result.
- Details are important, especially around the eye area. Avoid deep shadows.
- Using a photo-flash (even outdoors) will fill in shadow areas.
- Make sure that the color in the photo is accurate when ordering pastels.
- Photograph the animal as close as possible.
- Animals do not have to be professionally photographed. A good snapshot will do equally well.

Cricket

Full body black and white. Drawn on light blue gray paper

Most black and white graphite pencil drawings are done on a light tan, 100% cotton fiber, acid free, 65 lb Strathmore charcoal paper. A light blue-gray paper is sometimes recommended when there is an excess of white hair, such as Cricket and the Llama.

Kokyo

Black and white head shot on light tan paper
